

Stormwater Management Facility Improvements

Site 3 - Villa Park Pond | Newsletter #3 | November 2022

Improvements are underway

The City of Vaughan is undertaking important municipal infrastructure improvements to various stormwater management facilities and outfall locations. Stormwater management facilities are designed and built to collect rainfall and surface water runoff.

As part of the Capital Works Program, the City is overseeing the construction work to retrofit the Villa Park Stormwater Management Pond, located northwest of Pine Valley Drive and Villa Park Drive. These enhancements support the City's continued commitment to ensuring the long-term sustainability of municipal infrastructure.

Scope of Work

In addition to the restoration of the existing channel, the scope of work includes excavation and grading of the stormwater management pond.

Timelines

Construction has begun with anticipated completion by fall 2023.

Construction Impacts

Roads will remain open to vehicular and pedestrian traffic during construction. Temporary traffic diversions will be required at times to allow construction activities to proceed in a safe and efficient manner.
