

# Stormwater Management Facility Improvements and Park Revitalization

Gallanough Park and area | Newsletter #3 | November 2022

## Improvements are underway

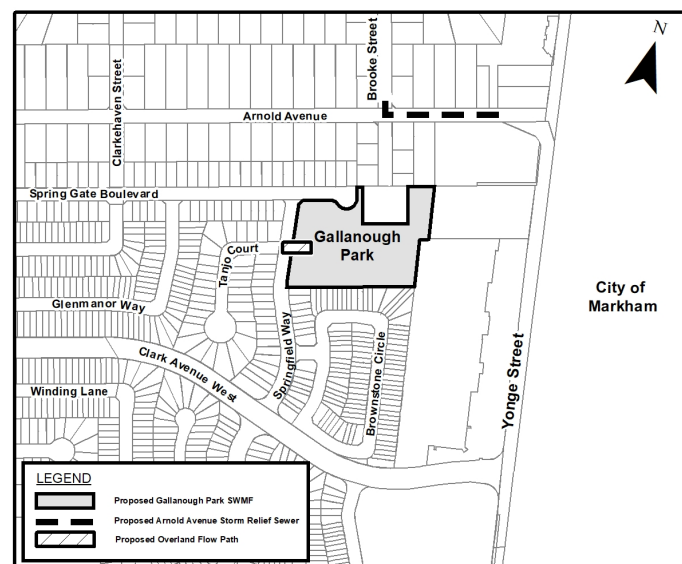

The City of Vaughan is undertaking important municipal infrastructure improvements to the stormwater management facility in your neighbourhood. Stormwater management facilities are designed and built to collect rainfall and surface water runoff.

As part of the Capital Works Program, the City is overseeing the construction work to assist in alleviating the risk of flooding that occurs north of Gallanough Park during high intensity rain events. These enhancements support the City's continued commitment to ensuring long-term sustainability of municipal infrastructure.

## Construction Update

An underground stormwater management facility is being constructed in Gallanough Park with a storm relief sewer on Arnold Avenue and Brooke Street, as shown on the enclosed map.

The construction schedule has shifted due to labour disruptions, material shortages and unforeseen site conditions. These issues, along with adverse weather conditions, have contributed to delays in completion. The City is working closely with the consultant and contractor to expedite the work.

## Park improvements are coming

Park revitalization plans are advancing with the Thornhill SNAP program as shown on the enclosed park rendering. New features for Gallanough Park will include:

1. new and upgraded playground area
2. new pollinator gardens
3. new shade structure with seating areas
4. new accessible walkways with new furnishings throughout the park
5. new outdoor fitness equipment located at five fitness stations
6. upgraded walkway lighting

Further details about the park revitalization, including anticipated construction start and end dates, will follow.
