

Sustainability

Sustainability

- Reduce demand related to energy, water, resources and waste treatment
- Support efficiency for energy, water, resources and waste treatment
- Coordinate servicing capacity to respond to increased demand
- Celebrate Vaughan's heritage and people
- Promote active transportation networks
- Use a native plant palette and explore xeriscaping

- **Sustainable Site**
 - Reduce Carbon Footprint
 - Reduce load on Natural Systems
- **Storm Water Management**
 - Landscape for rainwater collection and absorption
 - Maximize green roofs
- **Energy Efficiency**
 - Design 'solar ready' buildings with high performance envelope/ systems
 - Use district energy powered by geothermal, solar and other efficient forms of energy
- **Green Building Strategy**
 - Integrate LEED goals
 - Select renewable, recyclable/recycled materials
 - Foster a culture of recycling / composting
 - Design for adaptability
