

# TRAFFIC CONTROL NOTICE

## SINGLE LANE CLOSURES ON JANE STREET

Effective September 30, 2024 to December 30, 2024

As part of the work to facilitate future development within the Vaughan Metropolitan Centre (VMC), a new underground utility trench is being constructed to transfer existing overhead hydro lines along the Jane Street corridor.

To facilitate construction, temporary traffic control staging is required along Jane Street. This will include single lane closures of the northbound curb lane between north of Highway 7 to north of Portage Parkway. Portions of Jane Street northbound and south bound lanes will be shifted and reduced to accommodate construction of crossing trenches, however two-way Jane Street traffic will be maintained at all times.

The impacts described above are anticipated to commence on or around September 30, 2024 and continue to approximately end of the year (December 30, 2024).
