

# Disruption Alert

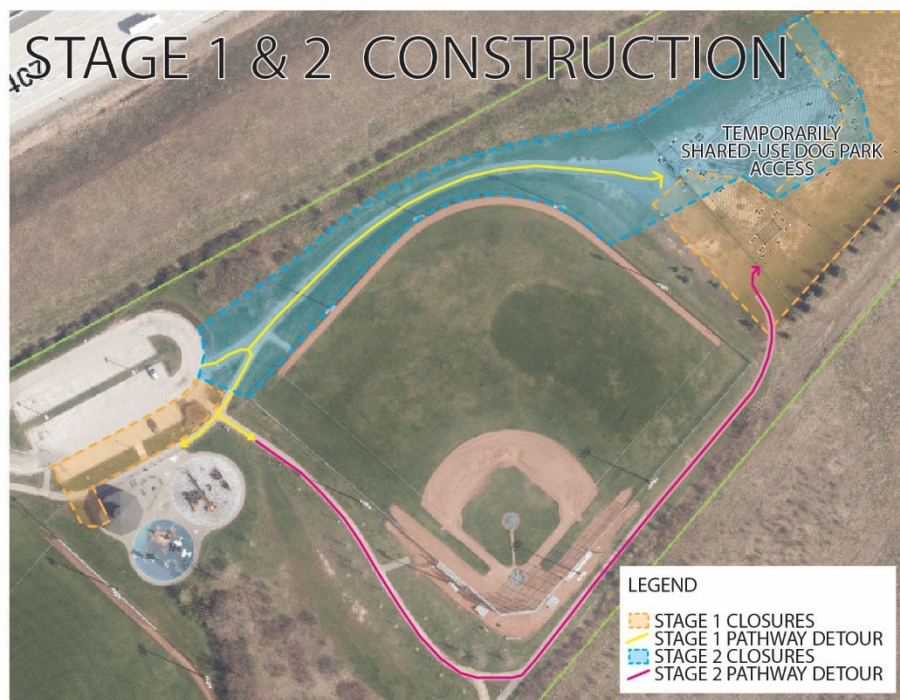

**Temporary closures: Concord Thornhill Regional Park, primary off-leash dog area**

**Effective October 2024**

The City of Vaughan has finished phase one construction of the primary off-leash area at Concord Thornhill Regional Park (299 Racco Parkway). Phase two construction is scheduled to begin in early October and will include paving and electrical work to improve accessibility and lighting.

Construction will take place in stages and is expected to last approximately two weeks. Visitors should expect closures in the park as the work is completed.

During this time, a temporary-shared use (combined large and small dog area) will be available.

**To safely complete the work, fencing and signage will be in place to advise park users of closed areas.** We kindly ask residents to respect safety fencing barriers and adhere to all posted signage.
